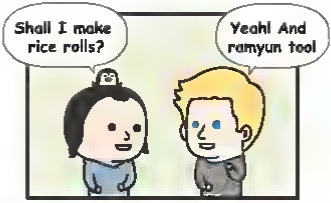
Penguin
Loves Mev
In the UK

Nettle



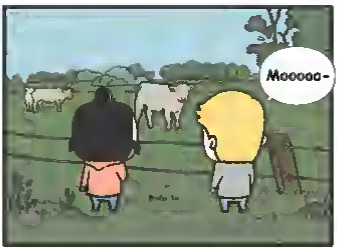
Shall I make rice rolls?
Yeah! And ramyun too!

We love sesame leaves,
the Korean herb.

It's very hard to find it in England,
even at Korean supermarkets.

However, we can find a leaf called 'Nettle',
which looks very similar to sesame leaves
in England very easily.

A few years ago.



Mev and I went for a walk
when we visited Gail and Andrew's.

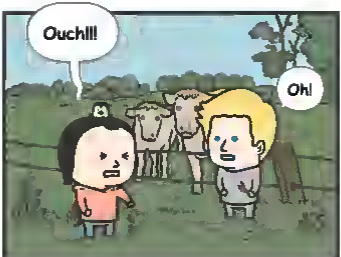
We fed the cows on the field
with fresh leaves from around the fence

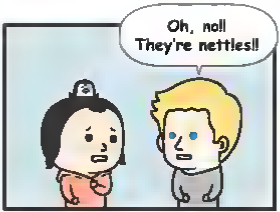
We were having a very fun time.

I was very excited

Then,

I grabbed a bunch of leaves
that looked like sesame leaves.

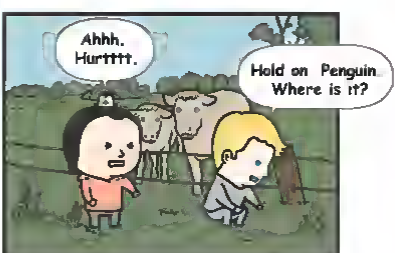




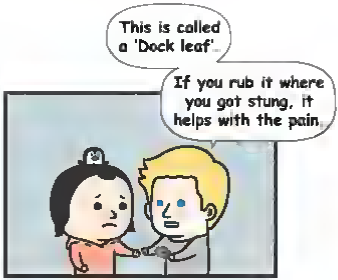
They were nettles.

Nettles have many stinging hairs and it stings badly if your skin touches it.

It keeps on stinging
even if you just graze by it.

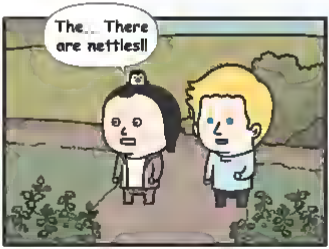


But I grabbed them tightly.
You can guess how bad it was.



Mev rubbed my hand with a dock leaf but it didn't do much.

That day, I suffered from
the pain for a long while.



Since that day,
whenever I see nettles...

I would die for some
sesame leaves.
